

KEEPING YOU MOVING FORWARD WITH ELECTROMOBILITY >>

MACK MD: READY TO GO ELECTRIC?

Nextran Truck Centers and Mack Trucks are committed to the future of electromobility. We can partner with you on topics like operations and route planning, chargers and infrastructure, total cost of ownership, funding and more. The Mack MD Electric delivers the reliability, reduced maintenance and zero emissions you want and the performance and smooth, quiet operation your drivers want. The Mack MDE is available in 5 wheelbase options, 2 battery size options, Class 6 and 7 ratings and with an E-Power Take Off (E-PTO) option.

POWER SOURCE

3 Phase Permanent Magnet Synchronous motor with 260HP peak power and 185HP and 960 ft-lbs of torque of continuous power

BATTERIES

2 Batteries (150 kWh) or 3 Batteries (240 kWh) NMC lithium-ion

CHARGING SYSTEM

Up to 80 kW charge rate with DC power source or 16-19 kW charge rate with AC power source

BRAKES

Two-stage regenerative brake system for reduced brake wear, reduced operating costs and extended operation cycles

E-PTO

Optional SAE A, 2 bolt mounting, 13.4HP Electric Power Take Off

FINANCING

Vehicle, charger and infrastructure project financing available

CHARGING TIME: 1.5-3 HOURS @ 80 kW DC OR 6-11 HOURS @ 19.2 kW AC POWER

MACK ULTRA SERVICE AGREEMENT

5 or 6-Year/Bumper-to-Bumper Protection Plan

- Included with every Mack MD Electric truck sold
- Complete coverage for all electrical control systems, powertrain, chassis, suspension, cab, steering systems, battery state of health & more
- Covers all scheduled & preventative maintenance repairs (excluding accidents, tires & glass)
