VOLVO VNR: READY TO GO ELECTRIC?

Nextran Truck Centers is committed to the future of electromobility, in partnership with Volvo. We can guide you through topics like total cost of ownership, infrastructure, funding and more. The Volvo VNR Electric is built for local and regional distribution, pickup & delivery, and food & beverage distribution. With a range of up to 275 miles, the VNR makes electromobility possible for local and regional applications.

CHARGING INFRASTRUCTURE

Nextran and Volvo Trucks will partner with you as you select your third-party charging stations. We'll also help as you define your requirements with local utilities.

VOLVO GOLD CONTRACT

All VNR Electric trucks are sold with a 5 or 6-year Volvo Gold Contract, a managed service contract that includes maintenance, towing, planned and unplanned repairs, battery state of health and uptime services.

FINANCING

Volvo Trucks and Volvo Financial Services can assist you in securing financing for both vehicles and infrastructure, so your transition to electric is easier.

CHARGING TIME: 4 BATTERIES - 60 MINUTES; 6 BATTERIES - 90 MINUTES
